

Date and time 	Location 	Targets for today 	Describe what you have done today. 	What went well? 	Even better if? 	Progress Evience 
Date and time	E.G. College, LRC, Home, etc	Please list you targets for this lesson.				[Screenshot or screen recording]
07/01/2025	College	Do Research and planning for the new project	Started doing my research and created a basic level to help me get a feel of the audio and visuals and puzzles im gonna be using in my game.	Easily created a base level to help come up with audio and started to fill out my research and planning	If i was able to finish the research section and add a bit more to my base level	
16/01/2025	College	Work on models on blender	Started creating my hallway models for my sci-fi escape room game in blender	Made a basic unpolished corridor design that i can then full polish and it will look good once fully done	If i was able to fully polish and finish the model completely and fully be able to test it inside of unreal engine	
21/01/2025	College	Work on functionality for the first puzzle of the game aswell as add some audio	I added functionality for the first puzzle aswell as drew a interact ui that shows whenever you can interact with an object aswell as added some AI voice for the puzzle	Made interact UI in pixel art aswell as coded all the of the first puzzle and added and coded my animation blueprint for my new character model	Even better if i was able to add more puzzles in and finish the start of the game with main menu and starting narrative	
23/01/2025	College	Work on a bit of art for the ui of the game to give it a better feel and look better	Drew a button pressing animation in pixel for showing the player to press that button to interact	Was able to improve my art skills by drawing a button pressing animation is pixelk with a red button with the letter E with a hand that goes up and presses it	Even better if i was able to implement this into my game and have it working and functioning inside the game	
24/01/2025	College	Finish my first iteration and add character model and animations	Finished my first iteration and added character model and animations and helped others with code and blender	Easily did my first iteration and did character models and animations aswell as helped others with codes and models	Even better if i made some models too aswell as added them into my second iteration	
28/01/2025	College	Work on first second and start the third iteration for my escape room	Finished my first and second iteration coded player movement and added jumpscars into the game aswell as other interactive objects	Finishing my first and second iteration aswell as added interactive objects and scared friends with jumpscars	Even better if i was able to add more puzzles in and finish the start of the game with main menu	
30/01/2025	College	Create more models inside of blender ready to be imported and coded into unreal engine	Made two models one being a kitchen counter and the other being a Dresser	Easily created two models for my escape room ready for when i code them inside unreal engine	Even better if i was able to put them into unreal engine 5 and code them so they work as intended	
31/01/2025	College	Work on models and add interactive objects to create game fuctionality	worked on models and added them in the game so they work and add to the games playable feature	Easily modelled and added them into the games and made them work so the game is more playable	Even better if i was able to finish all the models so i was able to easily finish the whole game	
04/02/2025	College	finish my puzzles so i have a playable game ready to code the main menu	Coded all puzzles and added the rest of my jumpscars so that everything works aswell as rest of my audio	Easily finished all my puzzles and added the rest of my jumpscars to make the game playable	Even better if i was able to finish all the levels so the game is finished	
07/02/2025	College	Work on the website	I started working on my website getting to the game and product page as i finished the homepage aswell as planning and research by coding them in html started recording some of the videos needed to fill out the product page	i easily was able to code the website more and add all the pages that i needed to add apart from the game product page and the evaluation page	Even better if i was able to finish the game product page and the evaluation page so that the website was finished	
11/02/2025	College	Work on my website and add more code to it	Almost finished the game/product page and finished recording all of my voice over videos and put them on the website ready for submission	Easily added more to my website and was easily able to record the voice overs for my website	If i could of started the evaluation page and finished uploading the last two videos to my game/product page	
13/02/2025	College	Finish the website and upload it to github ready for submission	Added everything i needed to finish my website apart from my reflective log i added more images more explanation finshed my evaluation page	was able to finish the website today by adding the rest of the images and videos i needed aswell as finish the evaluation page i needed to do.	Even better if i was able to add the reflective log in.
